General Assembly
Web Developement Immersive
October 2018 - January 2019

Developed and deployed four completed full stacks web applications during a 12 week, 500hr Web Development Bootcamp.

Projects:

Garden Manager # Ruby on Rails HTML CSS JS
A full stack web app where users can manage their home garden and receive plant care reminders. Client makes AJAX calls to a custom Rails backend and formats incoming data with Handlebars and jQuery.

Tic-Tac-Toe # HTML CSS JS
A classic game that scales to a user selected board size using jQuery DOM manipulation and supported by dynamic game logic. Tracks game history and user with a Ruby API via AJAX calls.

Tic-Tac-Toe # HTML CSS JS
A classic game that scales to a user selected board size using jQuery DOM manipulation and supported by dynamic game logic. Tracks game history and user with a Ruby API via AJAX calls.

Tic-Tac-Toe # HTML CSS JS
A classic game that scales to a user selected board size using jQuery DOM manipulation and supported by dynamic game logic. Tracks game history and user with a Ruby API via AJAX calls.
